Supplementary Material for "A Template for IEEE Publications"

First A. Author, *Member, IEEE*, Second B. Author, *Senior Member, IEEE*, and Third C. Author, *Fellow, IEEE*

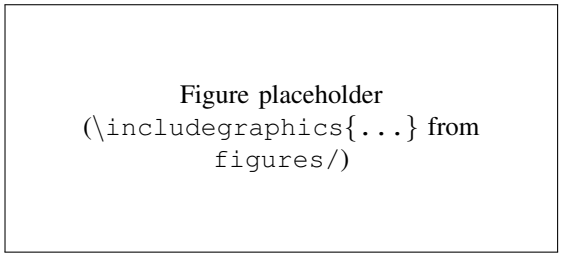

Fig. S1. Placeholder figure.

TABLE S-I
ABLATION STUDY

Variant	Accuracy (%)
Full model	91.3
Without component A	88.0

S-I. Additional Derivations

This document collects material that did not fit in the main paper. Start with the full derivation of a result stated there, for example

$$\hat{\theta} = \arg\min_{\theta} \sum_{i=1}^{N} \left\| y_i - f_\theta(x_i) \right\|_2^2, \tag{S1}$$

which follows the notation of [1]. Equation (S1) is numbered (S1), so the main paper can cite it without ambiguity.

S-II. Additional Experiments

Extra results go here. Fig. S1 and Table S-I show how floats are numbered in this document.
